Specialized Lab Testing for Myositis, Antisynthetase Syndrome, and Interstitial Lung Disease (ILD)

Presented by Dr Alan Epstein and moderated by Dr Ann Salm

The objectives of this webinar include:

- Review clinical features of myositis, antisynthetase syndrome, and interstitial lung disease (ILD)
- Discuss autoantibodies specific to and overlapping in these conditions
- Highlight testing panels to assist in diagnosis

Presented by:

Alan Epstein, MD

Clinical Professor of Medicine,
U-Penn, Section Chief,
Division of Rheumatology,
Pennsylvania Hospital,
Philadelphia

Alan Epstein, MD is clinical professor of medicine at the University of Pennsylvania School of Medicine, and chief of rheumatology at Pennsylvania Hospital, where he practices clinical rheumatology.

He was president of the Philadelphia Rheumatism Society, fellow of the American College of Physicians and the American College of Rheumatology (ACR), and served on the Professional Development Committee and Affiliate Society Council of ACR. He received the 2010 Joseph Hollander Award from the Pennsylvania chapter of the Arthritis Foundation for excellence in rheumatology.

Moderated by:

Ann E. Salm, PhD,
MSc, M(ASCP)^{CM}

Director, MSL Lead,
Infectious Diseases/Immunology,
Quest Diagnostics

For more than 5 years, Dr Ann Salm has served as director and lead medical science liaison (MSL) for infectious disease and immunology in field medical affairs for Quest Diagnostics. In that capacity, she is an MSL mentor and field clinical consultant for infectious disease and immunodiagnostics, with a specific focus on molecular infectious disease, transplant, allergy and autoimmune testing. She also provides detailed scientific data internally to sales team members, and externally to key opinion leaders and thought leaders in those clinical disciplines. Finally, Dr Salm assists in the development and implementation of training programs to internal and external stakeholders, and supports Quest's ongoing research and publication strategies.
